Funky Kaleidoscope Pendants

By Jeanie Sumrall-Ajero (www.KalCollections.com)

Supplies:

- Personal computer and printer
- [Kaleidoscope Collections](http://www.KalCollections.com) Kaleidoscope Kreator™ software
- Digital image (from digital camera or scanned)
- [Little Windows](http://www.LittleWindows.com)® “Make 3 Kit” *
- Paper punches in the size and shape you want for your pendants

* Little Windows is a unique resin, which is non-toxic, low odor, low-bubbling, and stays crystal clear. It's perfect for in-home crafters!

Instructions:

1. Open the digital image in Kaleidoscope Kreator and create a kaleidoscope to your liking.
2. If you want to use the entire kaleidoscope for the pendant, size the kaleidoscope to be 0.1” smaller than the punch size and add a 0.2” print margin when printing the kaleidoscope. If you want to use just a portion of the kaleidoscope for the pendant, then print the kaleidoscope up to 2x the size of the paper punch.
3. When punching out the kaleidoscope, turn the paper punch upside down so that you can line up the printed kaleidoscope inside the punch opening.
4. Follow the instructions in the *Little Windows* “Make 3 Kit” to make the pendants.

Notes:

For more information on using Kaleidoscope Kreator with the Little Windows resin, see <http://kaleidoscopecollections.com/blog/?s=resin>

For tutorials and videos on how to use the Little Windows resin, see <http://www.little-windows.com/makeyourown.php>
