

HOT GLUE STENCILS

Supplies:

- Ad Tech Hi-Temp Project Pro Glue Gun
- Ad Tech 2 Temp Glue Gun
- Ad Tech Multi Temp Glitter Mini Gluesticks
- Ad Tech Multi Temp Full Size Gluesticks
- Optional: Ad Tech Finger Guards
- Teflon Craft Sheet
- 12x12 Watercolor Paper
- Mist (yellow and red)
- DCWV Sweet Blossom Stack
- 3x2.5" photo
- Brother ScanNCut
- DCWV Cardstock Stack Brights
- Paintbrush – small
- Mini mouse pad
- Quickie Glue Pen
- Adhesive
- Scissors

Instructions:

1. Working on a teflon craft sheet, draw a simple design with Ad Tech 2 Temp Glue Gun. I find the hi-temp works a bit better than the low temp. You want your design to be attached in multiple places, so that it holds together

2. when you pull it up from the craft sheet.
2. Switch to the Ad Tech Hi-Temp Project Pro Glue Gun. Load the gun with blue glitter glue. Working on a teflon craft sheet, create several small dots of color.
3. Continue to draw designs for later projects until you've used up all the blue glitter glue. Switch to red glitter glue and working on a teflon craft sheet, draw the scallop embellishment.
4. Let the glue cool.
5. Once the glue is cool, carefully pull your Ad Tech hot glue stencil off the mat. Place the stencil(s) onto a sheet of watercolor paper and spray with spray ink. Move the stencil around as you desire.
6. Let dry or dry with a heat gun.
7. Remove the tag paper from the DCWV Sweet Blossom Stack. Cut several tags from the sheet.
8. From the largest tag, cut out a triangle to create a pennant shape.
9. Layer the tags together, along with a photograph.

10. Add the word "me" and your title, both cut using the Brother ScanNCut. The "me" was created using fonts found in the machine and cut from a piece of patterned paper from the DCWV Sweet Blossom Stack. The title was written on a piece of paper and scanned into the Brother ScanNCut. It was then cut from blue cardstock from the DCWV Cardstock Stack Brights.
11. Adhere a strip of patterned paper from the DCWV Sweet Blossom Stack to the edge of the layout.
12. Fussy cut two flowers from a piece of the DCWV Sweet Blossom Stack.
13. Place the flowers on top of a mini mouse pad and use the end of a paintbrush to create dimension.
14. Adhere the two flowers on top of each other, and then to the page.
15. Remove the hot glue scallop from the teflon sheet and adhere it the layout.
16. Remove the blue glitter glue dots from the teflon sheet. Adhere one to the center of the layered flower. Adhere several other dots around the layout.
