

# Glitter Photo Corner Cards

by Julie Fei-Fan Balzer

## SUPPLIES

- \* pre-made cards
- \* Therm-o-web Glitter Dust Photo Corners
- \* Scissors

## TIPS

Many fun geometric patterns can be created using the Therm-O-web self-adhesive Glitter Dust Photo Corners. Here are some tips for creating your own:

- \* Start by putting the

points together. Four points fit perfectly to create a basic shape you can riff off of.

- \* When you trim the excess bits from the edge of the cards, save those bits to use in other places on the card.
- \* To create a sense of movement, overlap the photo corners to create the look of arrows.
- \* Trim the black edge off the

photo corners to create a shorter glittered piece for layering.

- \* Always go off the edge. This helps make the design feel like an overall pattern rather than an embellishment you've stuck on.
- \* Things don't need to be perfect. If there are gaps or funny angles, embrace them! That's the beauty of making something handmade.
- \* **BONUS:** Create an easy house embellishment by adding a heart and a chimney to a photo corner!
